Description of remains, precise location and stratification (attach plans if necessary)

The field had only been rough ploughed and had a light covering of snow in places but was in a walkable condition; Only four pieces of 'Pancheon' type wares were picked up with two pieces of clay pipe stem and one piece of thick dark glass.

Conclusions: The lack of any Medieval pottery sherds from this field continues the trend of the area West of the village; The 'Heath' field names, adjacent, the proximity of the Hall and evidence of Park elements in field names in the area are all suggestive.
